

multiple dependent claims and to bring the claim language into compliance with U.S. practice. Claims 8 - 10 were amended to add in the definitions of the claims which, in the original claims, referred back to a claim (Claim 1) from which claims 8 - 10 are not dependent. Claims 25 - 27 and 29 were amended to remove the phrase "including a human" therefrom, which phrase had rendered those claims indefinite. Claim 31 was added to include a proviso. Claim 41 claims that subject matter as a dependent claim multiply dependent from claims 25 - 29. Claim 42 claims that subject matter as a dependent claim which depends from claim 32. Applicants submit that no new matter has been added by these amendments.

-Restriction Requirement-

The Examiner has required restriction of the instant application to one of seven Groups as set forth in the Office Action and reproduced below.

Group I. Claims 1 - 24 and 30, drawn to compounds of formula (I), classified in class 536, subclass 28.6.

Group II. Claim 25, drawn to a method of treating a mammal with a A2a receptor agonist, classified in class 514, subclass 43.

Group III. Claim 26, drawn to a method of treating a mammal having an inflammatory disease with a comopund of formula (I), classified in class 514, subclass 43.

Group IV. Claims 27 and 28, drawn to a method of treating a mammal having a respiratory disease with a compound of formula (I), classified in class 514, subclass 43.

Group V. Claim 29, drawn to a method of treating a mammal having septic shock, male erectile dysfunction, hypertension, etc. with a compound of formula (I), classified in class 514, subclass 43.

Group VI. Claims 31 and 33 - 38, drawn to a compound of formula (II), (VI), (X), (IX), (XII), (XIII), (XXI), or (XXII), classified in class 536, subclass 28.6.

Group VII. Claims 32, 33 and 38 - 40, drawn to a compound of formula (XXIV), (XXV), (XXVI), (XXVII), or (XX), classified in class 544, subclass 1.

Applicants hereby provisionally elect, with traverse, the invention of Group I, directed to Claims 1 - 24 and 30, drawn to compounds of formula (I).

Applicants respectfully request that the Examiner rejoin Groups II - VI with Group I since the only compounds used in the methods of Groups II - VI are within the scope of Group I. If, as Applicants believe, those compounds are novel and nonobvious, then it follows that methods of using those compounds should also be novel and nonobvious and, accordingly, patentable. That is, if the compounds are not found in a search of the class and subclass where the compounds are classified, then the compounds should also not be found in any class or subclass where the compounds are used in any method.

-Conclusion-

Applicants, having responded to all points and concerns raised by the Examiner, believe this application to be in condition for allowance. An early and favorable action is respectfully requested.

Respectfully submitted,
